

Motivation Letter

Dear Sir or Madam,

My professional experience is based on the theoretical and practical knowledge I acquired at DUE Bánki Donát Technikum. At the beginning of my studies, I primarily received theoretical training, but I also had the opportunity to familiarize myself with future practical tasks. Over the following three years, I specialized in the field of IT technician.

Continuous professional development is very important to me, and I strive to stay up to date with technological advancements. I am open to new challenges and highly motivated to take on new tasks. I find it especially inspiring to be part of an innovative team that places great emphasis on technical progress and achieves success in the competitive market environment.

I am confident that my enthusiasm, commitment to learning, and solid technical foundation would make me a valuable addition to your team.

Sincerely,

Krisztina Horváth
